

START YOUR IDEA WITH THE PANTER

Light Paper

Summary

Pantercon's Business Cycle 3.0 provides a platform that makes it easier for start-up entrepreneurs to raise capital. In a network of different companies and investors, not only start-ups can be promoted, but economic growth in general and returns for investors can be achieved.

Problem

Start-up capital is one of the biggest obstacles for a start-up company that can determine the success or failure of a business.

Getting a loan to start a business is difficult in most cases without security, especially if it is a business idea outside the mainstream. There are other options that founders might consider, such as how to raise capital, and crowdfunding is one of them. Crowdfunding has grown rapidly in the recent past, and on closer inspection, the crowdfunding system has shortcomings that may not benefit many entrepreneurs.

For a founder to receive large sums of investment, he must, among other things, submit a business plan that is costly and takes time that a founder does not have!

Solution

Pantercon creates a platform on which start-ups are supported with innovative and forward-looking ideas and thus receive capital without having to struggle with the bank, crowdfunding platforms or other financing options. Pantercon focuses on supporting start-ups in achieving their goals and developing into global companies.

In addition, the Pantercon network can offer and receive a wide variety of services - the economic cycle 3.0 is created, from which all networked companies and investors benefit.

Hydra Blockchain

The Hydra Blockchain becomes a hybrid blockchain and combines the advantages of public and private blockchains. With the implemented authorization concept, the release of data can be controlled across organizations such as serial numbers, batches, etc., but also internally via organizational units. Warehouse management, payroll accounting, time recording and many other appli-

cation possibilities are offered. For implementation, sidechains are used, which can be managed parallel to the mainchain and operated relatively autonomously. The extension of the possibilities is practically unlimited.

Characteristics

- Reinvention of start-up financing
 - Hydra Blockchain (Hybrid Blockchain)
 - Economic cycle 3.0
-

Investor benefits

The capital that investors provide to Pantercon is not only channelled to one project, but to many, minimizing the risk of investors losing their entire investment as a result of the failure of a project.

With the evaluation program, there is even the possibility of co-deciding which companies should receive support.

The market

The volume of crowdfunding and crowdinvesting transactions has increased rapidly in recent years, in some cases by almost 50%. So-called venture funding is also experiencing a high.

Pantercon only needs to tap a small percentage of this transaction volume in order to be successful with the economic cycle 3.0. The signs are clear for Pantercon!

Token usage

The tokens will be sold and the proceeds used to finance the Pantercon project. The PANX tokens will then be listed and tradable on Exchangers. Upon completion of the Hydra blockchain, the PANX token will migrate to the PANX coin.

Token specification

Name	Symbol	Type
PanterX	PANX	ERC-20 Token
Total Supply	Available for sale	Decimal points
1.000.000.000 PANX	500.000.000 PANX	0
Financing specifications		
Hard Cap	Soft Cap	Accepted currency
35.000 ETH	1.000 ETH	ETH (Ethereum)
Token Price		
PanterX per 1 ETH	Rate of exchange	Minimum deposit
1 ETH = 5000 PANX	0,0002 ETH	0,1 ETH

Not sold PANX Tokens

Pantercon has a highly scalable business model and the PanterX tokens were created without decimal places. As a result, burning tokens would be counterproductive.

PanterX tokens that are not sold during the ICO are assigned to the Pantercon reserve pool.

Output of the PANX tokens

PANX tokens will be issued from 01 November 2018 as soon as the respective transaction is confirmed.

PANX tokens will be visible in your ERC-20 wallet but will not be tradable until the end of the token sale on 31 January 2019.

Whitelist PANX Bonus Tokens

The Whitelist Bonus Registration for early investors starts on September 1, 2018 and has been extended by another month until October 31, 2018 by looking at the market and suggestions from the Pantercon family. For detailed information you need to register on our website in the category „Token Sale“ or above the whitelist button.

Token Bonus Structure

Advance booking bonus

In the period from 01 November to 30 November 2018 the Pre-Sale takes place, which is divided into three phases.

- Period 1: 1 November to 11 November 2018 +30% Token additional
- Period 2: 12 November to 21 November 2018 +20% Token additional
- Period 3: 22 November to 30 November 2018 +10% Token additional

Token Sales Dates

Dates Advance booking

The pre-sale starts on 01 November 2018 at 00:00 and ends on 30 November 2018 at 23:59.

Main ICO Phase

The main ICO sales phase starts on 01 December 2018 at 00:00 and ends on 31 January 2019 at 23:59 or when the hardcap is reached.

Info

If problems occur during the public sale, the smart contract for the token sale will be suspended until the problem is resolved.

Concluding sentence

The Pantercon team aims to make it easier for startup companies to set up with the economic cycle 3.0 and the Hydra Blockchain, to simplify the day-to-day business of entrepreneurs and to offer advantages to investors.
